DETAILED ACTION

The amendment filed November 22, 2004 has necessitated the following restriction.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5-13 and 19-21, drawn to a pavement, classified in class 404, subclass 31.
- II. Claims 14-18, drawn to a method of making, classified in class 404, subclass 75.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process does not require the asphalt surface course.

Note that if the method is elected, it is recommended that the preamble, "method of making of concrete of pavement," be changed in order to avoid a claim objection since the three recitations of "of" does not make grammatical sense.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3671

Specification

The abstract of the disclosure is objected to because it refers to the purported merits of the invention. Correction is required. See MPEP § 608.01(b).
